PROFILE

Industrial Designer with extensive experience in product innovation, design management, and market-driven development.

Expert in bridging aesthetics, functionality, and manufacturability across high-end consumer products, smart home devices, and fans.

Passionate about creating meaningful concepts that connect users, technology, and production realities.

As a husband and father of two, I bring strong interpersonal skills, a collaborative mindset, and clear idea presentation to teams and stakeholders.

EDUCATION

B.Des in Industrial Design
Hadassah Academic College, Jerusalem
|2006–2010

LANGUAGES

- English (Fluent)
- Hebrew (Native)

WORK EXPERIENCE

Lead Product Designer *TA Design, 2019 – Present*

- Lead designer for Eran Group's international consumer line (Home Depot, Lowe's).
- Created and led the design of smart fan concepts featuring air quality sensing, modular control systems, and integrated speakers, with a focus on user experience and production feasibility.
- Spearheaded concept-to-market processes, from research and concept development to CAD modeling, DFM, and mass production alignment.
- Collaborated with engineers, marketing, and stakeholders to ensure U.S. market readiness.
- Contributed to Eran Group's business success through design-led product development.

Senior Industrial Designer *Studio PK, 2011 – 2019*

- Led design for Keter, Curver, and Alibert brands, focusing on plastic consumer goods.
- Specialized in developing innovative textures, modular systems, and production optimization.
- Managed full design cycles, integrating design thinking with material innovation and tooling processes.
